SUMMARY

Full Stack Developer with 2+ years of experience designing and delivering scalable **e-commerce, ERP, and CRM solutions** using Node.js, TypeScript, React, GraphQL, REST APIs, and SQL. Experienced in Shopify development, NetSuite integrations, CRM workflows, order and fulfillment automation, warehouse management, third-party system integrations, 3D product configurators, and large-scale data migration. Strong focus on backend architecture, API design, asynchronous processing, data synchronization, and solving complex business requirements.

EXPERIENCE

Praella Private Limited March 2024 – Present
Full Stack Developer Surat, Gujarat

- Design and deliver scalable **e-commerce, ERP, and CRM solutions** using Node.js, TypeScript, React, Remix, Shopify GraphQL/REST APIs, and SQL across multiple client platforms
- Develop and maintain **NetSuite ERP integrations**, implementing backend services and data synchronization workflows across Shopify and enterprise systems
- Design and implement **CRM workflows** for customer and company accounts, relationships, addresses, validation, and business-specific operational processes
- Engineer **order, subscription, warehouse, and fulfillment automation** using webhooks, BullMQ, Redis, and third-party APIs to streamline complex business operations
- Architect **data migration and integration pipelines** for products, customers, orders, content, and media using Shopify GraphQL APIs, Prisma, and MySQL with batching, checkpointing, and error recovery
- Build reliable **system integrations** using REST APIs, GraphQL, and webhooks, with data transformation, asynchronous processing, retries, centralized error handling, and structured logging
- Translate complex business requirements into **technical designs, backend services, APIs, and production-ready workflows**, collaborating with product, design, and engineering teams

PROJECTS

BYSS – Studio Sheds | Warehouse & 3D Product Configurator

- Built a scalable warehouse and service-area management system for **Studio Sheds**, automating installation eligibility validation and warehouse assignment using ZIP-code coverage and business rules
- Implemented geolocation-based routing using latitude/longitude proximity calculations and Redis-cached datasets for fast warehouse and service-area lookups
- Developed an interactive **3D product configurator using Three.js**, enabling customers to customize and visualize shed products within the Shopify storefront
- Integrated **OBJ 3D models through Shopify product metafields** and implemented dynamic model loading, camera controls, lighting, materials, colors, and configuration-driven rendering
- Automated service-area and warehouse assignment workflows, **reducing invalid installation requests by 80%** and lowering operational support effort

Watkins – Shopify & NetSuite ERP Integration

- Engineered a **Shopify–NetSuite integration** to synchronize customers, products, orders, inventory, and fulfillment data between the e-commerce platform and ERP system
- Developed backend integration services using **Node.js, TypeScript, REST APIs, and GraphQL**, including data mapping and transformation between Shopify and NetSuite models

- Implemented automated order synchronization workflows to process Shopify order events and create or update corresponding ERP records
- Built inventory and fulfillment synchronization workflows to maintain consistent product availability and order status across Shopify and NetSuite
- Implemented asynchronous processing, retries, structured logging, and error handling to improve the reliability of ERP synchronization workflows

Shreeji Cooling System – Warehouse & Inventory Management System

- Developed a full-stack **warehouse and inventory management system** using **Node.js, React.js, and MySQL** to streamline warehouse operations and inventory workflows
- Implemented end-to-end **inventory lifecycle management** covering stock receiving, allocation, transfers, adjustments, and dispatch operations
- Built **RESTful APIs and business logic** in Node.js to manage inventory transactions, stock movements, warehouse operations, and related workflows
- Developed responsive **React.js interfaces** providing real-time visibility into product availability, stock levels, and inventory movement across warehouse operations
- Designed and optimized **MySQL database structures and queries** to maintain accurate stock balances, transaction history, and inventory movement records
- Automated key **warehouse and inventory workflows**, reducing manual intervention while improving data accuracy, operational visibility, and process efficiency

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Frontend: React.js, Remix, Three.js, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, GraphQL, Webhooks, Microservices
ERP/CRM & Business Systems: NetSuite, CRM Workflows, Customer Management, Order Management, Warehouse Management, Fulfillment Workflows, Business Rules, Workflow Automation, B2B Account Management
E-commerce: Shopify Admin/GraphQL APIs, Shopify App Development, Shopify Metafields, Recharge, 3D Product Configurators
3D & Visualization: Three.js, OBJ Model Integration, Interactive 3D Product Configurators, Dynamic Materials & Model Rendering
Databases: MySQL, PostgreSQL, Prisma ORM, Redis
Integrations: Shopify–NetSuite, ShipStation, Mapbox, REST APIs, GraphQL APIs, Webhooks, System Integrations
Cloud & DevOps: Git, GitHub, CI/CD Pipelines
Practices & Tools: Agile/Scrum, System Design, Microservices, Asynchronous Processing, BullMQ, Postman, Data Migration, API Design, Error Handling

EDUCATION

Haldia Institute of Technology
Mar 2020 – Mar 2024

Bachelor of Technology in Computer Science & Engineering
West Bengal

- **Relevant Coursework**: Data Structures & Algorithms, Database Management Systems, Operating Systems, Object-Oriented Design
