SHASHI KUMAR KHATRI

BACKEND-FOCUSED FULL STACK DEVELOPER

+91 9546454878 | shashikrkhatri9546@email.com | LinkedIn | GitHub | Surat, Gujarat, India

SUMMARY

Backend-focused software developer with 2+ years of experience delivering e-commerce, ERP, and CRM solutions. Experienced in Node.js, TypeScript, APIs, SQL, Shopify, NetSuite integrations, asynchronous processing, data synchronization, and workflow automation. Currently learning AI and building products with AI agents.

EXPERIENCE

PlanetX | planetxhq.com | India

Full Stack Developer | October 2026 - Present

- Collaborate with product, design, and engineering teammates to shape requirements into features for an AI-powered product.
- Contribute across the stack, building application experiences and the backend services that support the product.
- Work with the team to iterate on product capabilities and turn feedback into improvements.

Praella Private Limited | praella.com | Surat, Gujarat

Full Stack Developer, backend focus | March 2024 - September 2026

- Designed and delivered e-commerce, ERP, and CRM solutions using Node.js, TypeScript, React, Remix, Shopify GraphQL/REST APIs, and SQL.
- Developed backend services and data synchronization workflows for NetSuite ERP integrations, customer and company CRM processes, and business operations.
- Built order, subscription, warehouse, and fulfillment automation using webhooks, BullMQ, Redis, and third-party APIs.
- Created migration and integration pipelines for products, customers, orders, content, and media using Shopify GraphQL APIs, Prisma, and MySQL, with batching, checkpoints, and recovery.
- Improved integration reliability with asynchronous processing, retries, structured logging, centralized error handling, and collaboration across product, design, and engineering.

SELECTED PROJECTS

BYSS - Multi-Store Service Area and Warehouse Workflows

Heartland Sheds, Shed Liquidators, KidKraft, Gorilla Sheds | Shopify extensions, geolocation, Redis

- Built ZIP-code service-area validation and warehouse assignment using business rules and latitude/longitude proximity, with Redis-cached data for fast lookups.
- Implemented merchant-specific Shopify extension features and automated assignment workflows, reducing invalid installation requests by 80% and lowering operational support effort.

Longfield Gardens - Seasonal Commerce

BigCommerce to Shopify migration | Custom Shopify app | Geolocation

- Migrated store data from BigCommerce to Shopify with a smooth transition and zero data loss.
- Built a custom app for merchant-managed estimated arrival dates by season and plant hardiness zone; used customer latitude and longitude to populate ZIP code.
- Handled out-of-season purchases at checkout: a winter plant purchased in summer receives a winter start date based on the customer's hardiness zone.

SELECTED PROJECTS - CONTINUED

VIIA HEMP - Checkout Promotions

Shopify extensions | Customer-selected free item | Custom discounts

- Built a checkout extension that lets eligible customers choose their preferred complimentary item.
- Added merchant-configurable discount conditions by extending Shopify discount capabilities for campaign-specific offers.
- The merchant used the free-item and discount features during Black Friday 2025 and shared that they supported strong sales.

I'm Chef Too - Subscription Offers

Custom Shopify app | Recharge integration | Shopify Functions and extensions

- Created a custom app integrated with Recharge to support a special offer for customers with an active subscription for three months.
- Implemented Shopify Functions and extensions for merchant-specific discounts on subscription products.
- Provided ongoing merchant support for the promotion workflows; the merchant shared positive feedback and strong sales.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Backend: Node.js, Express.js, REST APIs, GraphQL, Webhooks, Microservices, API Design

Data and queues: MySQL, PostgreSQL, Prisma ORM, Redis, BullMQ, asynchronous processing

E-commerce and integrations: Shopify Admin/GraphQL APIs, Shopify app development, Shopify extensions, NetSuite, ShipStation, Recharge, Mapbox, system integrations

Frontend and visualization: React.js, Remix, Three.js, HTML5, CSS3

Practices and tools: System design, data migration, error handling, Postman, Git, GitHub, CI/CD, Agile/Scrum

EDUCATION

Haldia Institute of Technology | West Bengal, India | March 2020 - March 2024

Bachelor of Technology in Computer Science & Engineering

Relevant coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Object-Oriented Design.
